Subject: M6H1 - Harvey Response EN update 9/1/17
Date: Friday, September 1, 2017 7:39:32 AM

EN is providing assistance to TCEQ to potentially exercise enforcement discretion (most likely through waiver or no action assurance) from the OECA acting AA related to off-loading gasoline from railcars in the DFW area. We will have more details later this morning after we talk to TCEQ. HQ has been informed of the preliminary details – call scheduled for 9:00 am.

Providing technical assistance as needed related to the REOC for the Arkema, Crosby TX site.

In Austin, continue to support TCEQ in water plant assessment. R6 assisted in developing an Excel spreadsheet to track large groups of wastewater or water plants that are operated by a single corporation. Currently working on the spreadsheet for the City of Houston, with over 08 facilities that will be batched to the City Engineer to provide details for each facility.
